MEMOIRE SUMMARY

The skin as a **metaphore** of
the **human experience**

The skin as
a **symbol** of
humanity

Skin as a **mirror of the soul**
where **experiences** are
engraved

Touch as an **essential**
component of **human**
development

Ageing seen as a **disease** that must be cured

Social **obsession** with **youth** and **immortality**

Ageing seen as a **reminder** of **vulnerability** and **mortality**

Elders are **marginalized** from society and seen as a **burden**

The negative **experience** of ageing; elders **living as if they were already dead**

Opportunity to improve the experience of old age

THE EXPERIENCE OF OLD AGE

Recent
phenommonenon,
after WWII

Old age is
extending

Medical realities,
physical and cognitive
impairments

In France, old age
is considered to
begin at 62yrs old

(European Social Survey)

Third age “new
old” and fourth
age “old old”
